

HunEx Portal - Online Employment Information and Resource Center

<http://www.hungarianamerica.com/hunex/>

HunEx is an online information portal and database aimed at facilitating the mobility of knowledge and labor between Hungary and the United States. For Hungarian professionals, it is a selective database for job and research opportunities in the two countries tailored to their expectations. For Hungarian and American companies, it is a valuable resource for recruiting a highly-skilled US-trained labor force with local knowledge.

Building on the extensive network of our organization and its partners, the HunEx portal will be able to reach this special group of US-based Hungarian professionals numbered in the thousands. They represent the brain power and skilled labor that American companies with Hungarian ties will need for a successful business operation.
